Rev. 10-05

Your 12 Family House is *EXPANDABLE* to a 24 Family House!
IT'S EASY...

Simply buy a second 12 Family House. Then use the "trim and drill" template shown below.

IF YOU HAVE ANY QUESTIONS ON EXPANDING THE COMPARTMENTS OR ADDING ADDITIONAL HOUSES, PLEASE CALL 1-800-764-8688

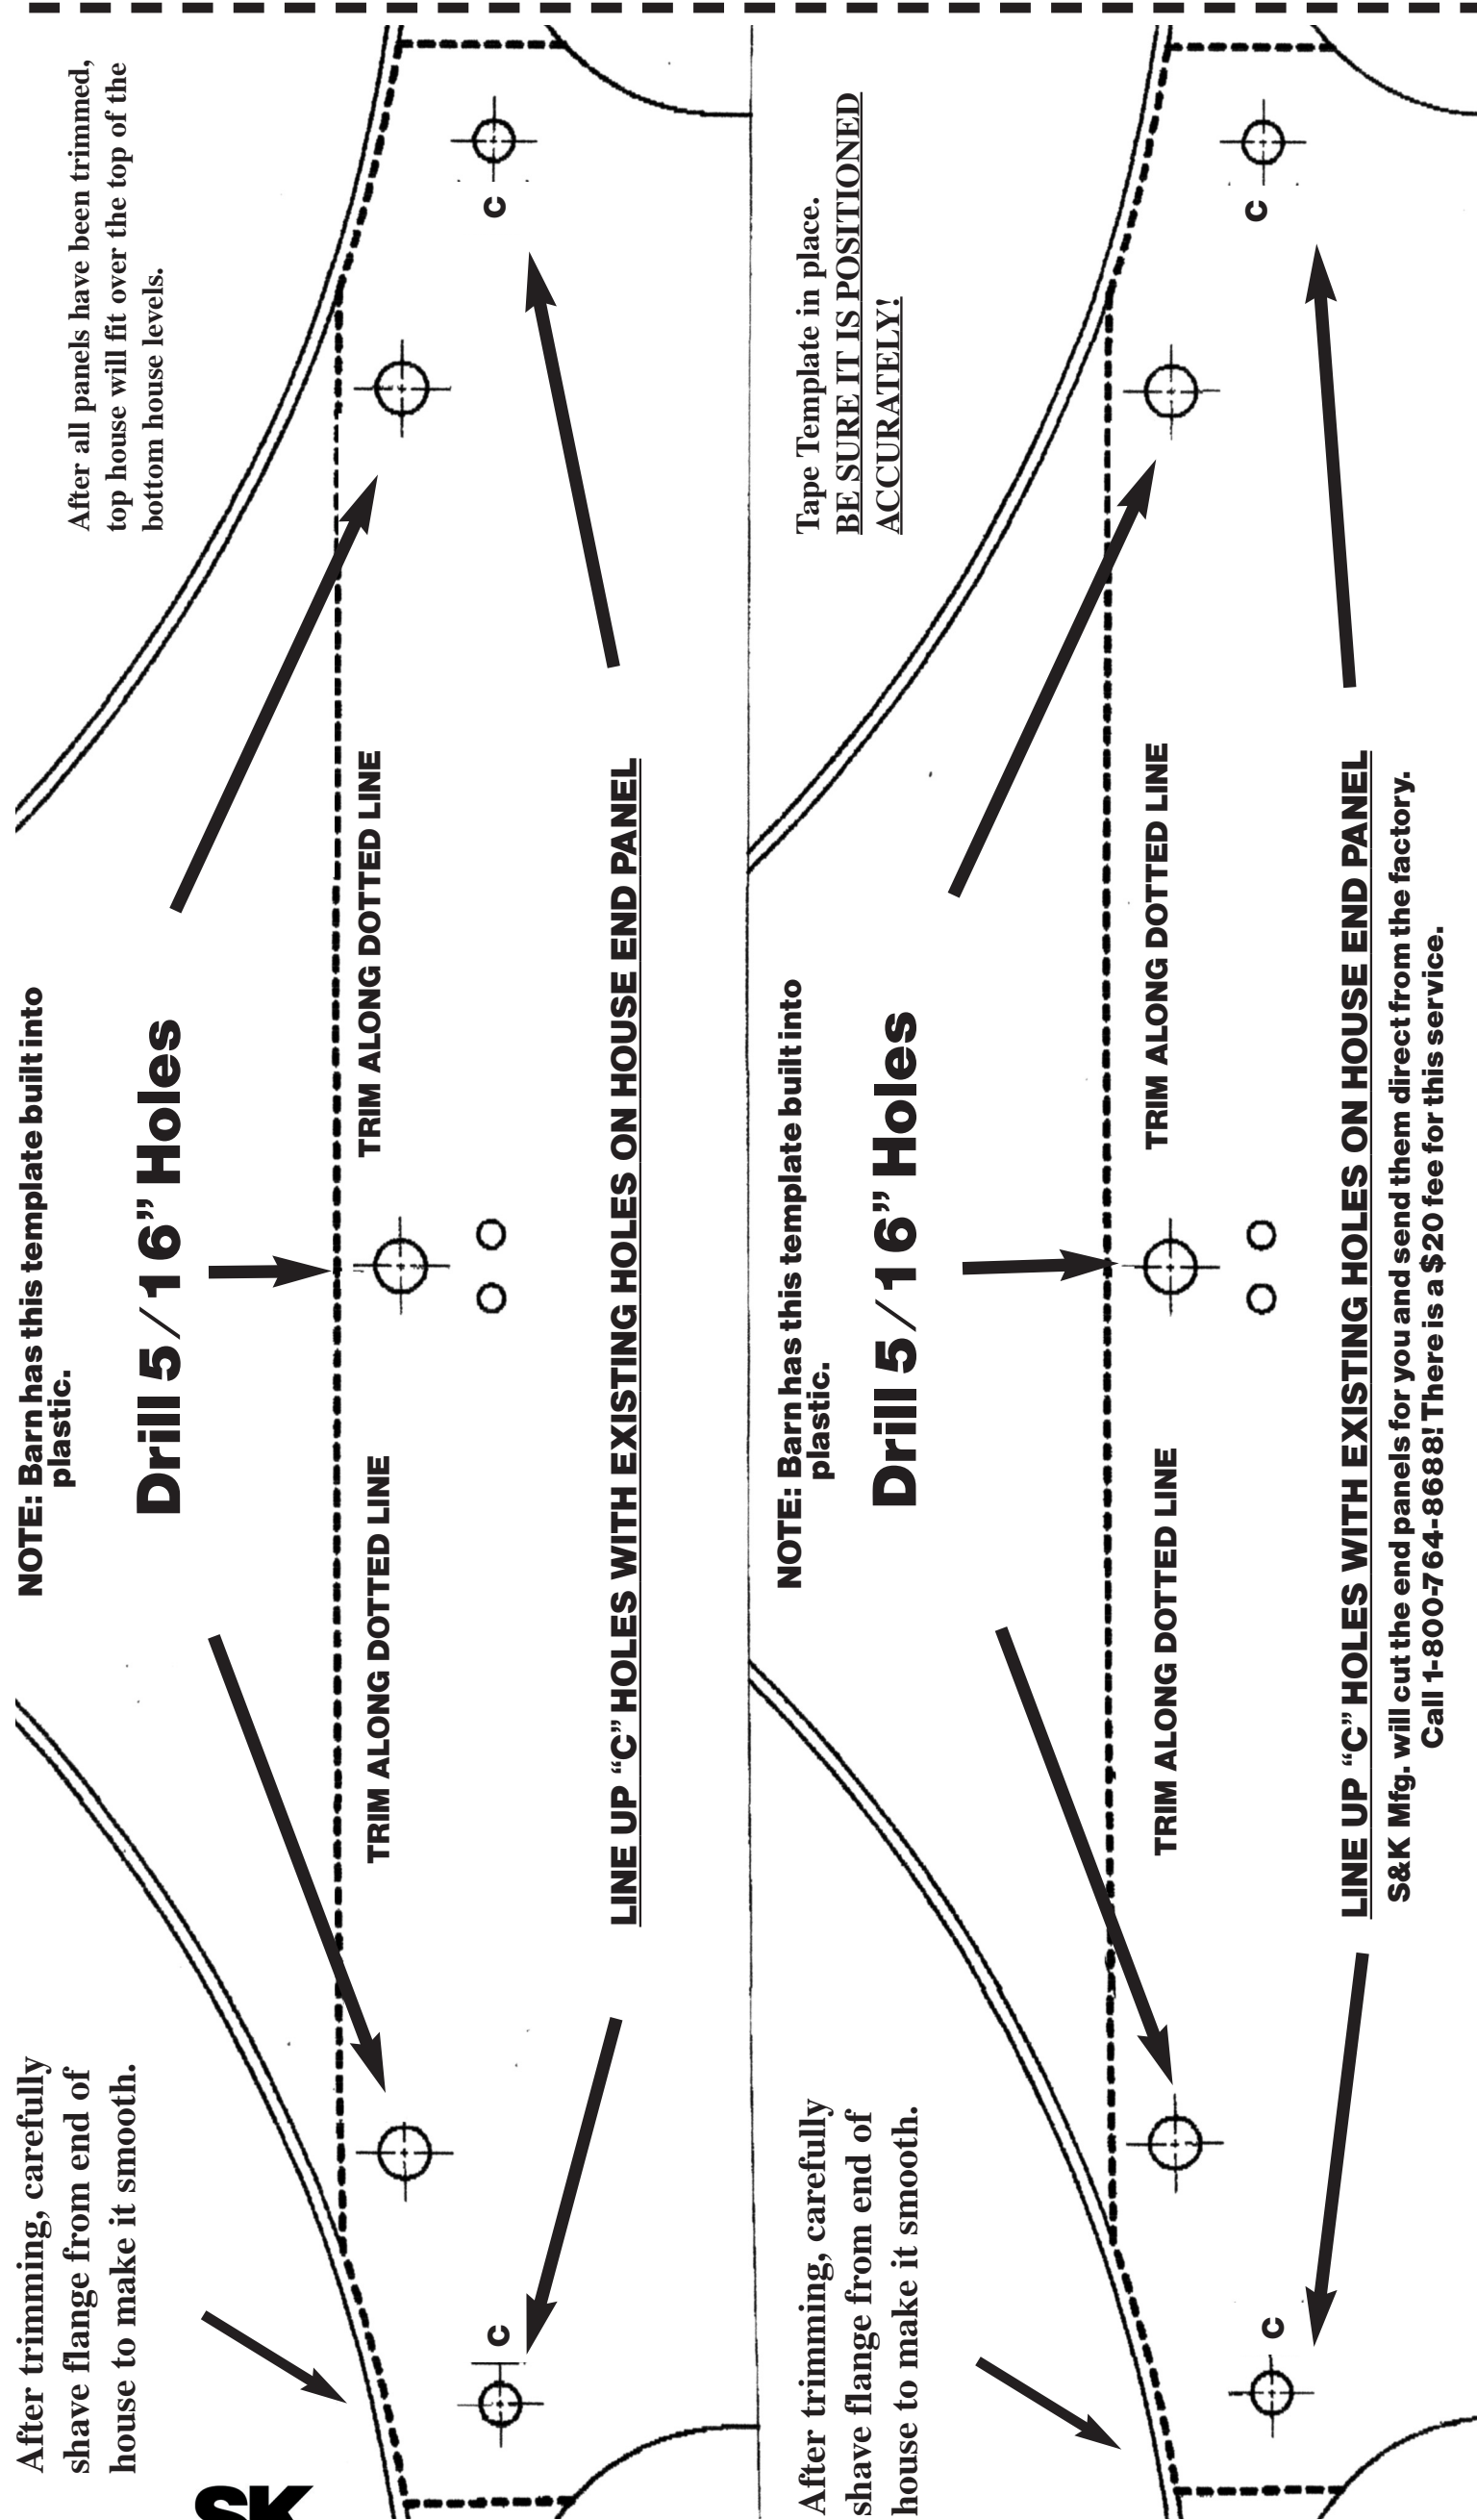

1. Separate the template in half, one for each side panel.
2. Line up the "C" Holes labeled on each side panel.
3. Tape each template to each side panel.
4. Trim along the dotted line VERY CAREFULLY.
5. Drill 3 additional holes as marked on the template.
6. Secure extra floors with a self-tapping screw to pole.

All S&K Martin Houses Are Expandable!

NOTE: All sides have the template in plastic for your convenience.

NOTE: Barn has this template built into plastic.

Drill 5/16" Holes

After trimming, carefully shave flange from end of house to make it smooth.

NOTE: Barn has this template built into plastic.

Drill 5/16" Holes

After trimming, carefully shave flange from end of house to make it smooth.

LINE UP "C" HOLES WITH EXISTING HOLES ON HOUSE END PANEL
S&K Mfg. will cut the end panels for you and send them direct from the factory. Call 1-800-764-8688! There is a \$20 fee for this service.

Instructions For Installing Your New Tri-Tel Pole

WARNING! FOR YOUR SAFETY!

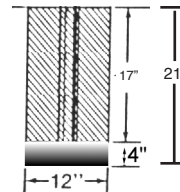

Examine your location for the Tri-Tel Pole. DO NOT ERECT POLE NEAR ELECTRICAL WIRES IN THE AIR OR UNDER THE GROUND! Pole is not warranted against high winds, weather and acts of God.

Step 1: Very Important

Insert Snap Button - V-Shape enters first. Push small snap in place in section A and B until it pops through the hole.

Insert 2 wadded-up plastic grocery store-type bags (not supplied) in the C Pole Section. Above the snap at the bottom of "B" insert 2 more wadded-up plastic grocery store-type bags (not supplied). They act as shock absorbers. Then insert snap.

Step 2:

After a safe location has been determined for raising your Tri-Tel Pole, dig a hole 21 inches deep and 12 inches in diameter. Create a 4" platform of concrete at the base of the hole. Let it set for 1 hour. If using the S&K SLEEVE, place the sleeve in the center of hole. (The sleeve allows for removal of the pole when desired.) Install Pole Section C (the largest section) into the hole OR sleeve. Fill around the pole or sleeve with concrete (one 80lb bag of Quik-Krete works best) - ensuring the pole section remains vertical and straight up and down. Add gal of water. Let concrete set for 24 hours prior to proceeding to the next step.

Step 3:

BE SURE POLES ARE IN ORDER SHOWN AT CENTER OF PAGE!
Insert pole section B fully into pole section C. Lower end of section A into section B.

Raise pole section A until the snap button snaps into place. Raise section B until it snaps into a locked position.

Step 4:

Snap Martin House, Bird Feeder, Bat House, Gourd Set, or Flag Kit on top of Section A and enjoy your new Tri-Tel Pole.

Purple Martins

PMCCA PURPLE MARTIN CONSERVATION CLEARINGHOUSE AND ASSOCIATION

The plans for this free site are to have the latest information available to all people that have, want or are interested in purple martins. It will contain information from around the U.S. and Canada. This information will not just come from a single organization with only their views on the subject, but from many martin landlords and enthusiasts, many with years of experience, and from those that are interested in the safety and welfare of purple martins. Information such as tips to attract them, tips on what to do once you get them along with the latest housing innovations and products.
