

Adding Additional Single Gourd Racks

To Your Tri-Tel or Quad-Tel Pole

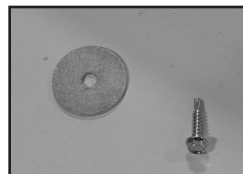

The "A" section of the S&K Tri-Tel and Quad-Tel Pole has three black snaps. If you're using the top snap for a Single Gourd Rack, a second Single Gourd Rack may be snapped in place on the third button from the top. 

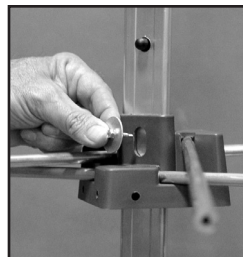

If your gourds are too large for this setup, or you're using the second snap for your top level of gourds, consider the following instructions for attaching a second Single Gourd Rack.

Additional parts required (not included):

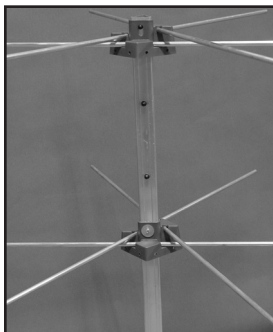

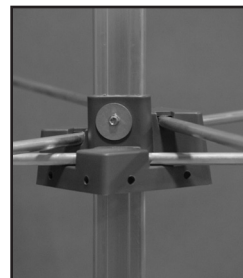

- 1) No. 8 (3/4") Self tapping screw
- 1) 3/16 x 1" Fender Washer

Determine where you want the second Single Gourd Rack on the pole. 

Insert the screw through washer and opening of the Single Gourd Rack and tighten. 

Add your gourds to the two racks and enjoy!
