

INSTRUCTIONS

GR6

Gourd Rack 6

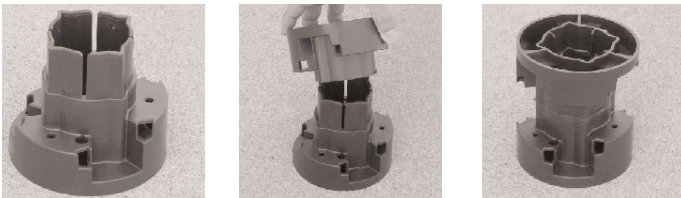

For RP19, 1.9 inch Round Pole

Parts List:

- 1 – Gourd Rack Hub (Tall)
- 1 – Gourd Rack Hub (Short)
- 3 – 3/8" Round Tubes
- 20 – Stars

Stars hold the Gourds on the Tubes. Put one star in front and one star behind your gourd on each tube.

If any parts are discovered missing, please contact S&K Manufacturing, Inc.

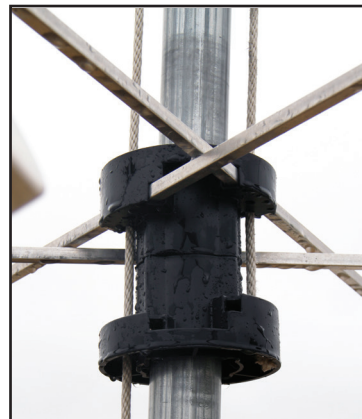

1. Put the two Gourd Rack hubs together as shown. Photo on left shows Tall Hub BE SURE THE ROPE HOLES LINE UP. (See Step 4 Photo for where rope runs through.)

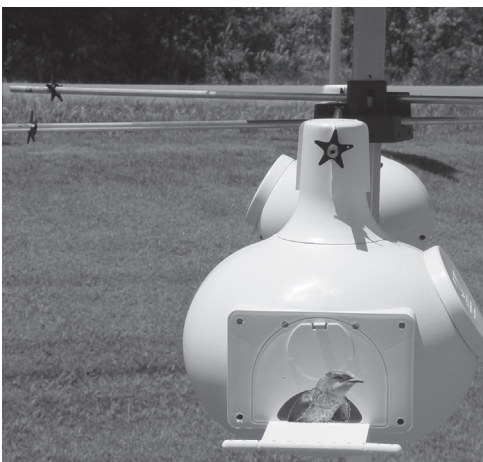

2. Ensure the rope is run through the pulley and allow it to hang down evenly.

3. Push the three Tubes through the Gourd Rack Hub as shown (tubes are inserted into the top hub). If it is difficult to push the Tubes in place, use soapy water on Tubes. Wipe dry once Tubes are in place. Place the Hub on the pole as shown.

4. Run rope through the Gourd Rack Hub. Tie off one end of the rope with a double knot under Gourd Rack Hub (as shown on left) and allow the other end of the rope to move freely through the hub, shown on right. The Gourd Rack Hub should move up and down the pole easily.

5. Push a Plastic Star on each Tube. Then push your Gourd in place. A second Plastic Star is then pushed onto the Tube. The two Stars will be moved against the gourd on each side to hold it in place.

When all gourds are in place, raise the Gourd Rack 6 to the top of the pole and tie off rope to hold it in place.
