

# **INSTRUCTIONS FOR ADDING A SECOND FLAG**

## **To Your S&K FLAG POLE**

1. Attach the first flag as normally, including a weight attached to the bottom tie that wraps loosely around the flag pole.
2. On the second flag, run an attaching tie through the bottom grommet of the top flag and the top grommet of the lower flag. Do not over-tighten the connecting tie.
3. On the bottom grommet of the second (lower) flag, use a second weight and run another tie through the grommet, weight and loosely around the pole. Allow some slack in the bottom tie so that the flag can move freely around the pole with the wind.

An additional weight can be purchased for \$.99 plus S&H
